Having regard to the Decree of the Minister of Education, University and Research of 9 March 2011, n. 102, setting the minimum amount of research fellowship grants;

Having regard to the article 15 of the Law n. 183 of 11 November 2011, defining the rules of certifications and replacement statements, and the prohibition of introducing in the implementation of European Union directives additional obligations compared to those provided for by the directives themselves;

Having regard to the request of the Director of the Department of Biomedicina, Neuroscienze e Diagnostica Avanzata (Bi.N.D.) received on 17/02/2021 protocol n. 17485 and the e-mail of 11/03/2021, concerning the activation of n. 1 Type B research fellowship grant, lasting 12 months, within the ARISLA project “Architecture of cell differentiation, stress-mediated protein expression and transport in iPSC-derived Motor Neurons bearing a pG376D TDP-43 mutation”, with Scientific Director Prof. Vincenzo La Bella;

Having regard to the resolution of the Board of the above mentioned Department of 12/02/2021, concerning the request for activation of the research fellowship grant: “Differentiation, culture and analysis of iPSC-derived motorneurons bearing a TARDBP G376D mutation”, to be carried out at the Department of Biomedicina, Neuroscienze e Diagnostica Avanzata (Bi.N.D.);

HAVING REGARD to the declaration of allocation of the above mentioned budget covering the research fellowship grant sent by the Administrative official of the Department above-mentioned;
Art. 1 - Duration and amount of the research grant

A public selection procedure is called, based on qualifications and interview, for the assignment of n. 1 research fellowship grant for collaboration in research activities (Type B) as specified below:

- Scientific-disciplinary area: 06
- Scientific-disciplinary sector: MED/26

- Department of Biomedicina, Neuroscienze e Diagnostica Avanzata (Bi.N.D.)
  - Scientific Director: Prof. Vincenzo La Bella

- Title: Differentiation, culture and analysis of iPSC-derived motorneurons bearing a TARDBP G376D mutation

- Description:

Expression and localization of the TDP-43 protein following the induction of cellular stress in motor neurons obtained by the differentiation of pluripotent stem cells from patients presenting the G376D mutation

Background. ALS, or amyotrophic lateral sclerosis, is a progressive neurodegenerative disease that affects nerve cells in the brain and the spinal cord. When the motor neurons die, the ability of the brain to initiate and control muscle movement is lost. There are two different types of ALS, sporadic and familial. Familial ALS means the disease has a strong genetic basis; to date several related genes have been found. Among these, mutations in the gene encoding the protein TDP-43. A few years ago, a novel TDP43 mutation associated to ALS was reported and a very large genealogic tree from the family carrying this mutation was made leading to a large collection of biological material from several family members, both affected and not clinically affected. The availability of such ample biological material prompted us to study the role of this mutation on the pathophysiology of the disease. Project aim. The aims of this project is to study the effects of this mutation on the localization and expression of the mutant protein in basal condition and after stress induction. To better understand the impact of the mutation on the disease we would like to carry out studies on the cells directly involved in the disease. For this purpose, we will differentiate pluripotent stem cells derived from skin cells of the subjects into motor neurons. Impact on ALS. A full understanding of the pathophysiology of the mutant protein related to the disease will be of great help in the comprehension of the pathophysiology of ALS, both sporadic and genetic. A large collection of biological material from the members of this family prompt us the advantage to share a similar genetic background. The evaluation of the growth and differentiation of iPSC-derived motoneurons carrying the mutation vs wild-type and the effect of acute and chronic cellular stress on the expression and subcellular localization of the mutant protein, represents for the core of this pilot project. It is bound to be the spearhead of future larger projects aiming to the discovery a specific treatment for this devastating disease.

In the first meeting, the Commission of selection, appointed by decree of the Rector, preliminarily and explicitly establishes the criteria and methods for assessing qualifications and the conduct of the interview. Subsequently, after having received the documentation of the candidates from the office and having examined the list of the candidates, it inserts, during the second meeting, a declaration showing that the commissioners are not in a relationship of kinship or affinity up to the fourth degree included, among them and with the candidates and that therefore there are not the causes of abstention referred to in articles. 51 and 52 of the Civil Procedural Code. Then it proceeds to the evaluation of the qualifications and the attribution of the relevant score, which is communicated to the candidates before the date of the interview. The Committee must complete the work within a maximum period of 60 days from receipt of the candidates' applications; it performs a comparative evaluation of the candidates based on the examination of the qualifications submitted by the same and an interview and draws up appropriate minutes according to the current selection regulations. The judgment of the Commission is unquestionable on the merits.

**Art.5 - Selection**

The selection is carried out through the evaluation of academic qualification and interview. Up to 70 points may be awarded to qualifications and up to 30 points to the interview. To be admitted to the interview, candidates must achieve at least 40 points out of 70 points for the qualifications. The interview is considered passed by candidates who have achieved at least 10 out of 30 available points.
Art.6 - Evaluation

The Committee will attribute the evaluation, expressed out of 100, according to the following criteria:

Titles

• up to 60 points for documented scientific activity according to the Unipa procedures for determining the status of active University researcher; theses and doctoral theses are excluded;
• up to 10 points for other qualifications (second level University master courses, post-graduate specialization courses obtained both in Italy and abroad, attendance of higher education institutions, organization of scientific meetings, periods spent at Italian and foreign scientific institutions).

Interview

Up to 30 points might be awarded for the interview, based on the discussion of the candidate’s scientific production and aiming at ascertaining the level of scientific knowledge with respect to the research program of the research fellowship grant as well as the knowledge of the foreign language (for candidates who do not hold the level B1 certificate).

Art.7 Interview and ranking

The place, date and time of the interview will be communicated at least 20 days before in the most appropriate manner to the candidates who, at the time of submission of the application do not enclose a declaration attesting to waive the legal terms of notice. Candidates must bring at the interview a valid identification document.
At the end of each interview session, the Committee will exhibit at the examination site the list of the examined candidates with the indication of the mark awarded to each one.
The interview will be public.
The Committee will post up the ranking of merit in descending order, adding the score of the qualifications to that of the interview.
The PhD, or a Medical Graduate School degree, for specific sectors, accompanied by appropriate scientific production, will be considered an advantage for the attribution of the research fellowship grant.
With equal merit, the candidate with a minor age will be preferred.
The Committee will complete its work and transmit the minutes, signed by each member, and all the relevant documents to the Servizio Speciale Ricerca di Ateneo - UO “Assegni di Ricerca” for further requirements.
The selection proceedings and the relative ranking of merit will be approved by decree of the Rector, and will be published, for a period of thirty days, on the official board of the University of Palermo.
